HI-PERFORMANCE FEED

A product of the "ENHANCER" concept: Performance enhancing feed with specialized additives blend for optimal growth

FEATURES

- Specialized for scaled fish (tilapia, anabas, snakeskin fish,...)
- Good physical characteristics: pellet homogeneity and smooth pellet surface to maintain good water stability
- Contain natural-based functional additives and specific antimicrobials to provide synergistic effects on external barriers (skin, gills, gut) and immune system

BENEFITS

- High floating rate to limit feed loss
- Durable feed pellets to reduce water pollution
- Good attractability to enhance growth performance
- Low feed conversion rate to increase farm productivity
